Early Indian Battlefield

Opened for Sight-Seeing

The scene of one of the bloodiest battles in the history of New England's early Indian wars, the Great Swamp fight of 1675, in Rhode Island, has been opened for sight-seeing by CCC workers. The Great Swamp fight was unusual because the Indians attacked the English instead of vice versa, says the National Geographic society. Several hundred English soldiers and their families were killed in the battle.

The battle marked December 19, 1675, as the date of a major encounter in King Philip's war, a widespread uprising in which the Indians killed the English and their families.

The scene of the Great Swamp fight is now a peaceful "island" of solid ground, grass covered in season, within the treacherous swamp near Kingston, on the mainland not 15 miles from Newport. No remnants of the Narragansett's large winter camp survives. A granite shaft commemorates the white man's victory, and flanking markers name the colonies which united for the attack—Rhode Island, Massachusetts, Connecticut and Rhode Island.
